PROFESSIONAL EXPERIENCE

Bungie, Bellevue, WA 2023 – Present
Senior Systems Engineer

- Maintaining and extending inventory, loot, and progression systems in C++ for live-service extraction shooter, *Marathon*.
- Architecting new systems to maximize composability with existing systems, which enable more gameplay feature possibilities that require less ongoing engineering support.

Rockstar New England, Andover, MA 2020 – 2023
AI Programmer

- Identified problems and implemented solutions related to AI decision-making during combat for *Grand Theft Auto VI*.
- Wrote performant, efficient C++ code to make the best use of time and memory resources.
- Closely collaborated with team members spread across various studios.

Digital Applied Learning and Innovation Lab, Hanover, NH 2018 – 2019
Software Developer

- Worked on software projects contracted by entrepreneurs, such as websites, apps, and games.
- Projects were team-led and followed a week-long sprint system to reach an MVP in 10 weeks.

PROJECTS

Drawing Hands 2023 – 2024
Solo Project

- A quine-inspired Rust program that takes a .ttf font file and a .jpg image and uses them to generate a program with an ASCII art copy of the image encoding a bitmap of the font.
- The generated program opens an arbitrary file in vim and produces a color image of the file's contents.

Pentultimate Solver 2021 – 2022
Solo Project

- Rust application using the Bevy game engine to manipulate and solve a 3D puzzle.
- Implementation of a custom, tiered breadth-first search to generate a solution.

Icosidodecahedron Vector Art 2020 – 2021
Solo Project

- C++ project to create .svg images of 3D fractals from various perspectives.
- Implementation of a custom polygonal union function to cull fully hidden polygons from the produced image.

EDUCATION

Dartmouth College, Hanover, NH 2016 – 2020
Bachelor of Computer Science and Engineering

- Distinguishments: 3.87 GPA, Magna Cum Laude, Phi Beta Kappa, 7 Citations of Academic Excellence, including citations for the courses:
 - Senior Design & Implementation Project
 - Computer Architecture
 - AR & VR Development
 - Software Design & Implementation

SKILLS

-
- Technical Languages: Rust, C++, C, C#, Python
 - Frameworks & Systems: PowerShell, Bash, Linux, WSL
 - Spoken Languages: English (native), Spanish (fluent), Portuguese (conversational)
